

UF College of Dentistry
Translational Science Seminar Series

Dr. Hatice Hasturk DDS, PhD

Director, Center for Clinical and Translational Research
at the Forsyth Institute;
Department of Applied Oral Health Sciences
Associate Research Investigator

“Diabetes: Periodontal Complications and Systemic Implications”

Dr. Hasturk is a clinician/researcher in Periodontology, with more than 15 years as a Board certified periodontist. Dr. Hasturk's main interest is understanding the mechanisms of periodontal and systemic diseases and its impact on public health. Specifically, Dr. Hasturk focuses on diabetes, cardiovascular disease, and other conditions that share a common inflammatory pathway with periodontal disease. She is also interested in the development and utilization of clinical and laboratory techniques to investigate the reciprocal relationships between systemic and local inflammation.

**Friday, January 10, 2014
12:00pm to 1:00pm
Conference Room: D3-39A**

*Feel free to bring lunch with you if you like
