

A COMPREHENSIVE ONE-DAY EDUCATION ON LASERS IN DENTISTRY

The World Clinical Laser Institute is the World's largest and fastest growing dental laser education organization with thousands of members worldwide.

WHO SHOULD ATTEND

General and specialist dentists who have heard about laser dentistry's potential to provide a more comfortable patient experience, expand treatment options, deliver new procedures to patients, or differentiate a practice, but who are unsure how lasers would impact their practice. Any dental professional seeking a convenient but comprehensive learning experience in the technology, clinical applications, and economics of laser-assisted dentistry. Current laser owners seeking a refresher or looking to upgrade their technology.

COURSE OBJECTIVES

Laser Technology

Provide a complete overview of the different types of lasers and wavelengths used in dentistry • Help you understand which laser is right for each type of dental procedure and practice, and for your practice in particular

Practice Integration

Explain successful strategies for the effective implementation of lasers into a practice, with special emphasis on the first 90 days with a laser • Learn first hand from dentists who have been through the experience of learning to operate the laser, being trained in its clinical applications, and differentiating themselves as laser dentists

Clinical Applications

Compare and contrast conventional & laser-assisted dental treatment in meeting the challenges of everyday dental practice • Focus on unique solutions that laser-assisted dentistry provides in the treatment of asymmetric gingival architecture, subgingival Class V caries, failed composite restoration due to micro leakage, single fractured teeth, and biologic width violation

THERE IS NO COST TO ATTEND, BUT SEATS ARE LIMITED SO PLEASE REGISTER TODAY

Hands-on Laser Lab

Evaluate what using a laser will really be like, under the guidance of trained clinicians • "Test drive" the WaterLase iPlus™ laser using hard and soft tissue samples, experimenting with different laser settings

Live Patient Treatments*

Learn how to introduce laser dentistry to anxious or fearful patients to perform painless, anesthetic-free dentistry • Observe live patient treatments by experienced laser dentists • Interact with clinicians and patients before, during, and after procedures

*May not be available at some course locations.
