

Successful Women in Science:

Do we have to act like men to be successful?

PANEL DISCUSSION as part of *Women's History Month*, Co-Sponsored with *Women's Student Association*:

Details: WiSE has invited a panel of UF faculty and administrators to a discussion on March 21st, 1-2:30, Reitz 286.

The invited panel will 1) discuss how they succeeded despite gender bias, and 2) share their ideas on how up-and-coming women scientists should act on a daily basis and in professional interactions to succeed in a gender biased world.

Anyone is welcome (graduate, undergrad, staff, post-docs, faculty) from any department (science or other), and any gender!

RSVP if you think you might join us: <http://www.surveymonkey.com/s/P99P2YL>

WiSE Who We Are:

The Women in Science and Engineering (WiSE) at the University of Florida is a graduate student- run, grass-roots directed program of discussions, workshops, and networking events designed to foster the success of women and other members of under-represented groups at all stages of their careers in science and engineering by providing a forum for academic and personal guidance and support. We welcome ALL members of the academic community at WiSE events.

Stay connected with WiSE:

- 1) Join the ListServ at our website: <http://www.biology.ufl.edu/WiSE/ListServ.html>
- 2) Add yourself to our roster on the UF Student Activities and Involvement page: <https://ufl.collegiatelink.net/organization/WiSE>

We have a new facebook page! Join us:
